CORSA® PERFORMANCE EXHAUST SYSTEM FOR 2015 MUSTANG GT

BEREA, Ohio – CORSA® Performance has developed a premium exhaust system to complement the bold style of the 2015 Ford Mustang GT 5.0L V8 coupe.

The new system features CORSA's exclusive Reflective Sound Cancellation® (RSC®) technology, which provides the best combination of aggressive sound under acceleration and a drone-free experience during cruise.

Acoustically styled for the pony car personality of the new Mustang GT, the system is available in two different sound levels. The three-inch cat-back, dual rear exit Xtreme option (part #14328/14328BLK) provides an aggressive sound and a deep, bold idle, while the three-inch axle-back, dual rear exit system (part #14326/14326BLK) features a high-performance Sport level sound, growling at idle and robust under acceleration. To experience the system in action, visit

According to CORSA marketing manager Brent Noward, "We were eagerly anticipating the launch of the sixth generation Mustang. The 2015 Mustang presented CORSA with a chance to make a lasting impression on the Mustang consumer, and we believe the new CORSA exhaust offerings showcase some of our best work to date. The new 5.0L Mustang, with its unique flat plane crankshaft engine, produces some absolutely exhilarating acoustics. CORSA's exhaust solutions are designed to enhance

those beautiful notes and provide a perfect balance of a raw, exotic, aggressive exhaust note with a mild mannered, non-drone driving experience at cruise.”

CORSA offers the Mustang GT exhaust system with single 4.5-inch Pro-Series tips in a choice of polished stainless or high-gloss black. Black Pro-Series tips are created using physical vapor deposition, a vacuum coating process that produces a brilliant, high-performance finish that won't chip, flake or peel and resists corrosion. The exhaust tips are manufactured from 304L polished stainless steel, feature double-wall construction, and are laser etched with the CORSA logo.

To increase flow and refine the exhaust sound, a 3-inch Double X-pipe option (part #14327) is available, sold separately. All system components, including clamps and hangers, are crafted in the U.S. using high-quality 304L stainless steel to ensure the product's appearance won't diminish over the life of the vehicle.

CORSA exhaust systems are 50-state emissions legal and come with a limited lifetime warranty, and include all necessary hardware as well as an illustrated installation guide. For more information, visit www.corsaperformance.com.

About CORSA® Performance
