CORSA® PERFORMANCE EXHAUST NOW AVAILABLE FOR DODGE DURANGO

BEREA, Ohio – In response to tremendous grassroots interest from Dodge Durango owner forums, CORSA now offers premium exhaust systems for 2011 and newer Dodge Durango SUVs equipped with the 5.7-liter HEMI® engine, bringing the company's patented no-drone Reflective Sound Cancellation® (RSC®) technology and a rich, aggressive rumble to owners of the third-generation Durango.

“CORSA exhausts are very popular among vehicle owners who respect advanced technology and top-quality construction, and now Durango owners can experience the sound and performance that CORSA exhausts provide,” said Craig R. Kohrs, vice president and general manager, TMG Performance Products.

The American-made cat-back dual exhaust system is constructed of corrosion-resistant 304L stainless steel. The 2.5-inch diameter pipes flow into 4.5-inch tips, available in either a polished finish (part #14459) or black PVD-coated tips (part #14459BLK), both laser etched with the CORSA logo. PVD, physical vapor deposition, is a vacuum coating process that vaporizes solid metal to a plasma of atoms or molecules, resulting in a vapor that is deposited as a high-performance coating. CORSA's PVD-coated Pro-Series Tips display a deep, brilliant, reflective black finish that won't chip, flake or peel and resists corrosion.

CORSA exhaust systems are backed by a limited lifetime warranty, are 50-state emissions legal and will not void the new vehicle warranty. Each system includes all

necessary hardware as well as an illustrated installation guide. CORSA Performance products can be purchased at Summit Racing Equipment, Jegs, AutoAnything.com and other major retailers. To find a dealer in your area, visit www.CORSAPerformance.com/dealer_locator_map.aspx.
