**NEW CORSA® PERFORMANCE EXHAUST SYSTEM ENHANCES MITSUBISHI
LANCER EVOLUTION X SPORT SEDAN**

BEREA, Ohio – CORSA® Performance now offers a premium exhaust system acoustically tuned to enhance the performance and exhaust note of the 2008 to 2014 Mitsubishi Lancer Evolution X.

Featuring CORSA's patented Reflective Sound Cancellation® (RSC®) technology, the precisely-engineered exhaust system complements the Evo brand personality with a Sport sound level which growls at idle, is robust under acceleration and offers a no-drone cruise experience.

For maximum horsepower, torque and engine efficiency, the CORSA® Mitsubishi cat-back exhaust system offers an unrestricted, straight-through design with a generous three-inch diameter air path with dual rear exits, which was flow bench-tested to achieve a 64 percent gain in exhaust flow versus a stock system, according to the company.

This high-quality, American-made system is constructed with corrosion-resistant 304L stainless steel, and is designed with single 4.5-inch tips available in either polished stainless steel or black Pro-Series tips. The black Pro-Series tips feature Physical Vapor Deposition technology, a vacuum-coating process that infuses the tips with a durable, high-performance black film, creating a brilliant, reflective black finish that won't chip, flake, or peel and resists corrosion.

"We are excited to expand our line of exhaust systems to include the popular Mitsubishi Lancer Evo model. Mitsubishi owners are knowledgeable and passionate

enthusiasts who are serious about making quality enhancements to their vehicles, and CORSA exhaust systems are an ideal fit,” said Craig R. Kohrs, VP and General Manager, TMG Performance Products.

CORSA Performance exhaust systems for are now available for 2008 to 2014 Mitsubishi Lancer Evolution X GSR manual and MR auto (part #14858/14858BLK). The exhaust systems are 50-state emissions legal and offer a limited lifetime warranty for as long as you own your Mitsubishi. CORSA systems include all necessary hardware as well as an illustrated installation guide, and are designed to bolt on and fit right, with no cutting or welding necessary.

About CORSA Performance
